9.3 x 62

The 9.3 x 62 was developed around the year 1905 and to date is a popular calibre for hunting Central European large game, in particular moose, red deer and wild boar. Furthermore, this calibre is very popular for drive hunting.

The GECO loads with a bullet weight of 255 gr are optimally suitable for this type of hunting. The lead-free bullet GECO ZERO is available in a light load with a weight of 184 gr.

For the training and competitions, there is also the 196 gr GECO sports bullet in a 50 pack.

GECO ZERO

GECO ZERO is GECO's newest development. It distinguishes itself with premium accuracy and outstanding stopping power – and is completely lead-free! This highly innovative jacketed bullet has two tin cores. Assisted by the hollow-point design, the pre-fragmented front core disintegrates instantly upon contact with the targeted animal and releases a large portion of its energy to quickly bring it down. Together with the jacket, the rear core remains a stable slug to penetrate and provide a certain exit wound. This makes GECO ZERO an excellent choice especially on light to medium game.

Construction GECO ZERO bullet

GECO ZERO: Lead-free bullet with great accuracy and terminal effect – for all game.

1. **GECO Performance Point:** for accuracy and certain expansion
2. **Pre-fragmented tin front core:** for reliable performance and solid stopping power
3. **Rear cannelure:** for high weight retention and a certain exit wound
