

# VICTORY® V8

The ultimate super-zoom riflescope from ZEISS

We make it visible.

// LIVING OBSESSIONS

MADE BY ZEISS

The moment you succeed through versatility, not luck.  
**This is the moment we work for.**

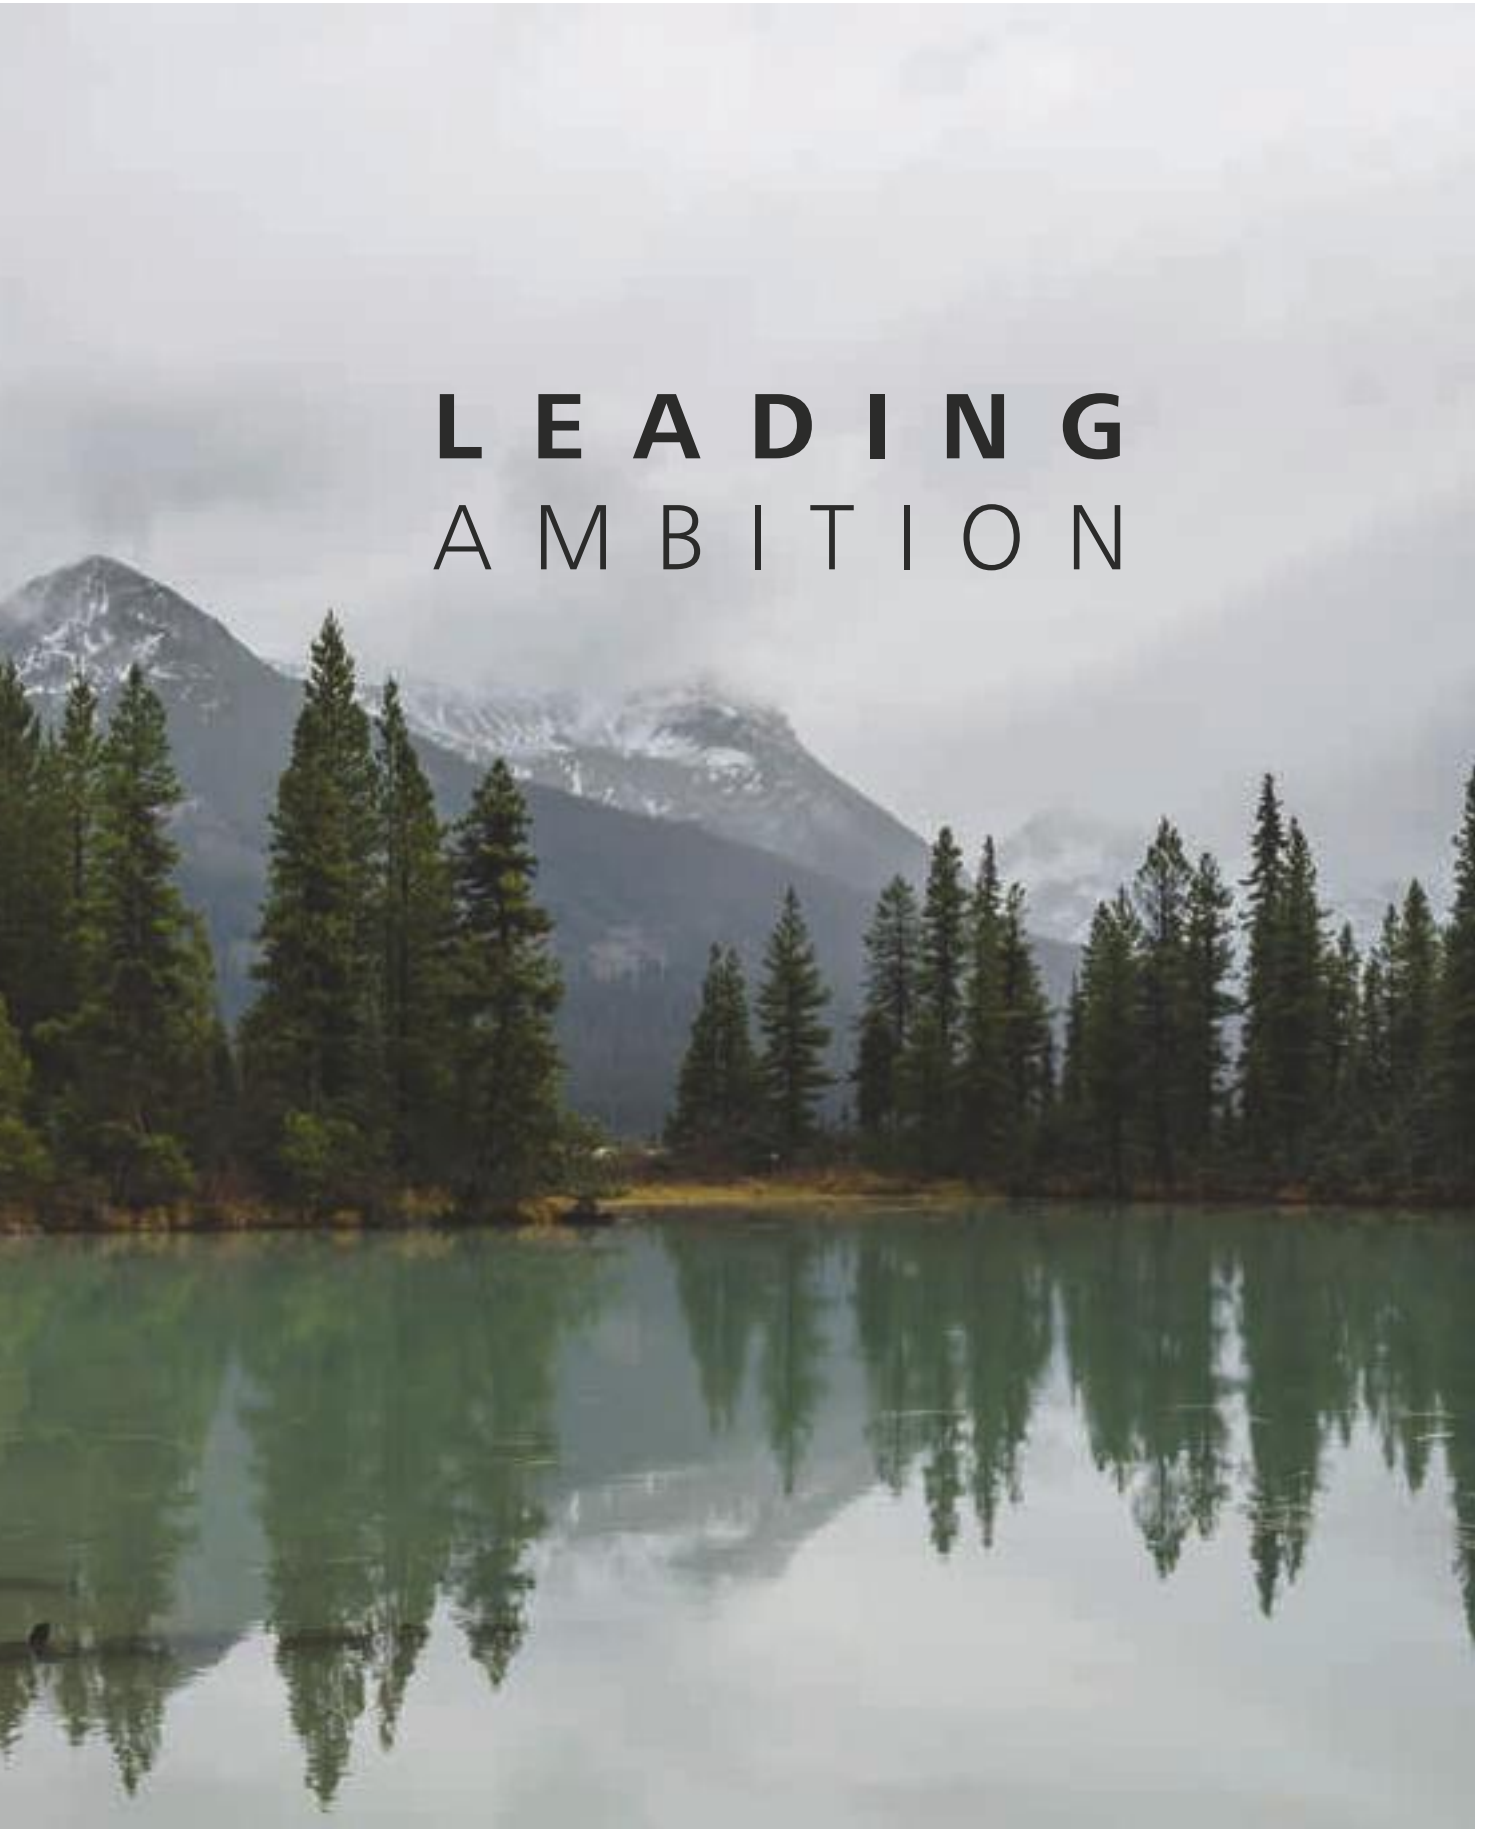

### **The best all-round riflescope from ZEISS**

The combination of maximum zoom range, the brightest optics and optimal ease of use makes the VICTORY® V8 from ZEISS the ultimate all-purpose riflescope for all distances and situations – whether you are on a drive hunt, stalking or sitting game, or shooting at long range. Whatever your venture, the ZEISS VICTORY V8 – the company's best super-zoom riflescope – enables fast reactions and maximum flexibility – all designed to ensure surefire hunting success.

# LEADING AMBITION

# ZEISS VICTORY V8

The true all-rounder in the premium class

Do you refuse to make compromises? So does your ZEISS VICTORY V8. This new riflescope is precisely what you've been looking for. It will impress you with its numerous innovations and sets a new standard in the premium class. From a drive hunt to stalking or sitting game up to a long-distance shot, the ZEISS VICTORY V8 is the best option every time: no riflescope has ever been this **flexible and versatile**. This is primarily due to its maximum zoom and bullet drop compensation range. The ZEISS VICTORY V8 owes its **outstanding image quality** and target resolution in this class to its unique **transmission of 92%**, fluoride lenses (FL), **HT glass** and the **extremely wide fields of view**. It has also set new benchmarks in ergonomic excellence. For example, the world's finest illuminated dot can be easily and precisely operated, while the short and compact design ensures maximum ease of use. The new ZEISS VICTORY V8 is rounded off by the new **BDC/ASV LongRange** whose large adjustment range ensures maximum distances. Regardless of the hunting situation, the ZEISS VICTORY V8 guarantees absolute precision and perfection. It is the only true all-rounder.

# FEATURES PRECISION

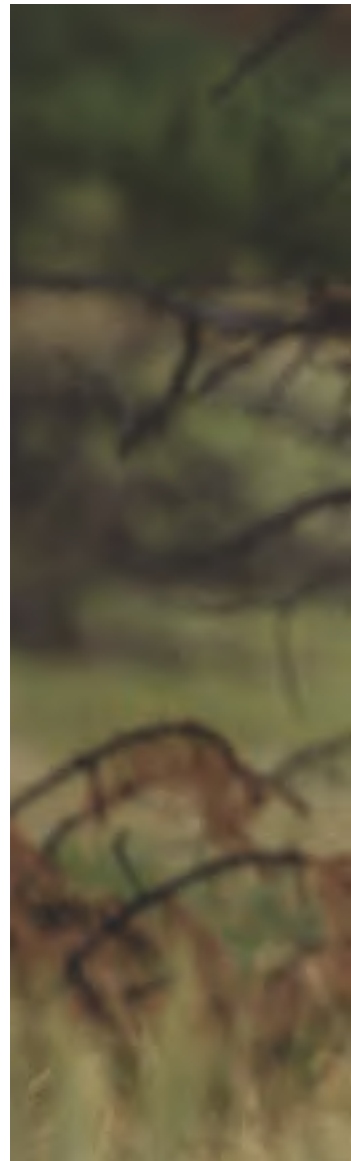

## More Versatile

Largest zoom range

A hunt is unpredictable – one of the reasons for its appeal. Whether you're drive hunting or stalking game in your local hunting grounds or elsewhere – the situation can change in a matter of seconds and you must be prepared. The large zoom range of 1.1–8 or 2.8–20, for example, and the associated flexibility at all distances make the ZEISS VICTORY V8 the best super-zoom riflescope on the market. And when the opportunity arises, the VICTORY V8 from ZEISS is ready and waiting – any time, any place.

## More Powerful

### Optical perfection

It simply isn't possible to view your target more clearly or brightly. The interaction of 92% transmission, fluoride lens elements and SCHOTT HT glass ensures outstanding image quality and target resolution. Furthermore, the optics feature unparalleled speed. The large exit pupils and extremely large fields of view ensure fast target acquisition and an excellent overview of the hunting situation. Precise shots through narrow lanes are not a problem with the ZEISS VICTORY V8. The large exit pupils enable fully relaxed viewing: no shadowing and an immediate round image. Experience the sheer brilliance and uniquely fast optical system of the ZEISS VICTORY V8.

## More Compact

### Performance-oriented design

Never before has a ZEISS riflescope been more sharply focused on performance and elegance than the VICTORY V8 from ZEISS. The new centre tube featuring a diameter of 36 mm enables a compact design, as well as a lot of room for optical excellence. The first time you look through the ZEISS VICTORY V8, you'll realize that such image quality and resolution simply cannot be beat. It is also more compact than comparable systems on the market, and therefore stands out with its maximum ease of use. It is an optical masterpiece and a totally new experience in design for uncompromising users who want top performance every time.

## More Precise

### True long-distance shot capability

The VICTORY V8 unites the latest technologies to create memorable moments: thanks to the directly readable shot distance, the new bullet drop compensator (**BDC LongRange**) is considered the most intuitive and thus most precise long-range shot concept in the world. The adjustment range of 100 clicks enables you to stay on target at distances up to 600 m – another benefit of the 36 mm centre tube diameter.

This precision is further enhanced through the minimal target subtension of the illuminated dot: a light fibre system thinner than a human hair provides the finest illuminated dot in the world, resulting in 3.3 millimeter subtension at 100 m. In other words: pure precision with the smallest target at the greatest distances.

## More Innovative

### Pioneering technologies

The multifunction button on the ZEISS VICTORY V8 line is the most advanced illumination control system on the market. It can be quickly, silently and intuitively operated even with gloves on. Another stroke of genius from ZEISS: the integrated intelligent motion sensor. The illuminated dot is automatically deactivated as soon as you put the weapon down. It reactivates as soon as you take aim – a feature that saves time and energy.

The background image is a blurred landscape featuring a mountain range under a cloudy sky, with a dense forest of evergreen trees in the middle ground. In the foreground, there is a field of dry, brownish-yellow grass and some green plants. A portion of a camera lens is visible on the right side of the frame, pointing towards the landscape.

# TECHNOLOGY FUNCTIONALITY

# ZEISS VICTORY V8

The most versatile riflescope from ZEISS

## Faster

Short reaction times

- Fast target acquisition and round images always. Large exit pupils and maximum fields of view make it happen.

## More Precise

True long-distance shot capability

- With an adjustment range of 100 clicks, the new BDC LongRange enables you to stay on target at distances up to 600 m. Long range is no longer an obstacle.

## More innovative

Pioneering technologies

- The new multifunction button to control the illuminated dot and the intelligent motion sensor to automatically activate the illuminated dot when the weapon is brought to a shooting position.

## Parallax compensation

Razor-sharp

- Ultra-crisp images at all distances thanks to the standard parallax compensation in all high-magnification models.

## More Powerful

### Optical perfection

- The interaction of 92% transmission, FL lenses and SCHOTT HT glass ensures outstanding image quality in the super-zoom riflescope class.

## More Versatile

### Largest ZOOM range

- Maximum zoom for maximum flexibility: from driven hunt to stalking and sitting game up to long-distance shots – with the ZEISS VICTORY V8 you are perfectly prepared for any hunting situation.

## More Compact

### Designed for performance

- The new 36 mm centre tube diameter provides more room for optical excellence and gigantic reticle adjustment ranges.
- The BDC LongRange makes use of this feature to enable shots at distances up to 600 m.

# ZEISS VICTORY V8 Riflescopes

## Model overview and specifications

### **ZEISS VICTORY V8 1.1–8x30**

The benchmark for driven hunts

Because of its maximum zoom range, the ZEISS VICTORY V8 1.1–8x30 is considered the most versatile driven hunt riflescope in the entire ZEISS product line. The 1.1x magnification typical of ZEISS products is ideal for target acquisition with both eyes open, as well as a quick shot at short distances. The high magnification makes the ZEISS VICTORY V8 1.1–8x30 a truly special product: with its high zoom factor, the specialist for driven hunts allows you to fire accurate shots even over long driven hunt distances. The 8x magnification also enables fast and reliable targeting.

The 39.6 m objective field of view is unusually large and provides shooters with a maximum overview and therefore safety and reliability on a driven hunt.

During development of the ZEISS VICTORY V8 1.1–8x30, the engineers in Wetzlar paid special attention to the “speed” of the product. The 10 mm exit pupil enables fast aiming. The combination of all these performance features makes the ZEISS VICTORY V8 1.1–8x30 the new benchmark among driven hunt riflescopes.

### **ZEISS VICTORY V8 1.8–14x50**

The ultimate all-rounder

The compact all-rounder provides a wide range of possible uses and maximum accuracy at any distance. A relaxed view and intuitive target acquisition ensure fast and reliable shots. The large zoom range (1.8–14x50) accompanied with parallax compensation makes this scope an ideal companion in any situation – from a drive hunt and stalking game to sitting game in the twilight.

### **ZEISS VICTORY V8 2.8–20x56**

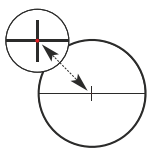

The perfectionist with light reserves

The 2.8–20x56 ZEISS VICTORY V8 opens up every opportunity – from long-distance shots to hunting deep into the twilight. 92% light transmission ensures bright, high-contrast images. This model is compact and easy to use, making it the perfect match for even the highest quality rifles. You can find more information on the BDC at: <http://www.zeiss.com/asv>

# Specifications

Model	(M) 1.1–8x30	(M) 1.8–14x50	(M) 2.8–20x56 with BDC LongRange
Magnification	1.1–8	1.8–13.5	2.8–20
Effective lens diameter	10.6 to 30 mm	18.6 to 50 mm	27.5 to 56 mm
Exit pupil diameter	9.9 – 3.9 mm	10.3 – 3.7 mm	9.8 – 2.8 mm
Twilight factor	3.1 – 15.5	5.1 – 26	7.9 – 33
Field of view at 100 m	39.6 – 5.4 m	23 – 3.1 m	15.5 – 2.1 m
Objective viewing angle	22.2 – 3°	13.1 – 1.8°	8.9 – 1.2°
Diopter adjustment range	-3.5/+2 D	-3.5/+2 D	-3.5/+2 D
Eye relief	95 mm	95 mm	95 mm
Parallax adjustment	100 m	50 m – infinite	50 m – infinite
Vertical adjustment range at 100 m	500 cm	310 cm	210 cm
Lateral adjustment range at 100 m	320 cm	200 cm	135 cm
Adjustment per click at 100 m	1 cm	1 cm	1 cm
Centre tube diameter	36 mm	36 mm	36 mm
Eyepiece diameter	46 mm	46 mm	46 mm
Objective tube diameter	36 mm	56 mm	62 mm
Nitrogen filled	Yes	Yes	Yes
Water resistance	400 mbar	400 mbar	400 mbar
Operating temperature	-25 / +50°C	-25 / +50°C	-25 / +50°C
Length	303 mm	343 mm	350 mm
Weight without rail	600 g	710 g	830 g
Weight with rail	620 g	730 g	855 g
Order number with illuminated reticle			
Without rail	52 21 07	52 21 17	52 21 37
With rail	52 21 06	52 21 16	52 21 36

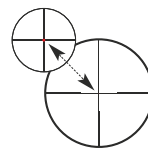

All ZEISS VICTORY V8 models feature the LotuTec protective coating and come with or without a rail. The BDC LongRange is standard on the ZEISS VICTORY V8 2.8–20x56 and optionally available for the 1.8–14x50. A laterally adjustable BDC is also available for these models. The 1.8–14x50 and 2.8–20x56 are equipped with parallax compensation. Subject to changes in design and scope of delivery as a result of ongoing technical development. ## Reticle 54

Perfected for driven hunts

This enhanced reticle combines the proven reticles 0 and 54. It stands for fast and reliable shots with minimal target subtension. The extremely fine illuminated dot is located in the second image plane and remains the same size when the magnification changes. Thanks to the new horizon indicator, it is particularly well suited for fast aiming because it prevents weapon canting.

## Reticle 60

Extremely fine and bright illuminated dot

It lies in the second image plane in all models and guarantees a constantly fine reticle throughout the magnification range – and thus minimal target subtension and noticeably higher shot accuracy at long ranges.

Model	Image plane	54	60
1.1 – 8 x 30	2	■	■
1.8 – 14 x 50	2		■
2.8 – 20 x 56	2		■
