

VICTORY® HT LINE

The brightest premium binoculars and
riflescopes from ZEISS

We make it visible.

// LIVING OBSESSIONS
MADE BY ZEISS

The moment you sharpen your senses.

This is the moment we work for.

The brightest optics from ZEISS

Above all, the VICTORY® HT line from ZEISS will impress you with breathtaking, bright images. This ensures the riflescope rises to the challenge every time, particularly in those tricky situations when brightness is of the essence: while hunting in twilight and deep into the night. Its innovative optical design and the best materials enable VICTORY HT products from ZEISS to achieve light transmission of 95% and more – a factor that can sometimes make all the difference. Centuries of experience and the latest technology combine to ensure your hunting success.

LEADING
AMBITION

ZEISS VICTORY HT

It's all about brightness

ZEISS has always been synonymous for bright, high-contrast optics – the company is now setting new standards: the new ZEISS VICTORY HT binoculars and riflescopes will go down as the **brightest optics in the company's history**. A revolutionary optical design enables them to achieve **transmission of 95%** and more. This is achieved through the perfect interaction of SCHOTT HT glass and the enhanced ZEISS T* multi-coating. ZEISS VICTORY HT products allow you to experience **hunting in a whole new dimension**. On a hunt, you can observe longer and hunt precisely – even late into twilight and at night. Experience cutting-edge optics – with the brightest premium optics from ZEISS.

F E A T U R E S
P R E C I S I O N

Brighter

Deep into the night

The revolutionary light transmission of 95% and more enables hunting deep into the night. This unique experience is the result of an innovative optical design. It is the combination of extremely transparent SCHOTT HT high transmission lens elements and the enhanced ZEISS T* multi-coating. This enables the ZEISS VICTORY HT products to set a new global standard for premium riflescopes. The bright, high-contrast images provide you with the extra few minutes you need on a hunt. After all, it is often the first or last light of the day that is vital for those magic hunting moments that will always remain in your memory.

More Elegant

Design based on tradition

The design of the ZEISS Dialyt® in 1962 made binoculars immortal. The ZEISS VICTORY HT is now following in the footsteps of this ZEISS classic – with further exciting enhancements. It is a design revolution born of tradition.

The same applies to the ZEISS HT riflescopes. A timeless design with sleek contours makes these riflescopes the right choice for your elegant weapon. Let the scope and your weapon merge to create a perfect pair.

More Ergonomic

Form follows intuition

The design of the ZEISS VICTORY HT line is based fully on intuitive and reliable operation. On binoculars, the convenient position of the focus wheel ensures ease of use and **fatigue-free focusing**. It is conspicuously large and easy to reach in the bridge. This allows you to conveniently operate the focusing wheel – even while wearing gloves. Furthermore, the low weight of these binoculars transforms the 8 and 10x54 into a new class of night hunting binoculars.

On the ZEISS VICTORY HT riflescopes, it is the control elements such as the illuminated dot, magnification changer or optional **bullet drop compensator** that can be **comfortably and quickly** adjusted. Rubber surfaces ensure a pleasant touch and comfortable grip. Together, the ergonomic features of the ZEISS VICTORY HT products are your guarantee for a perfect visual experience.

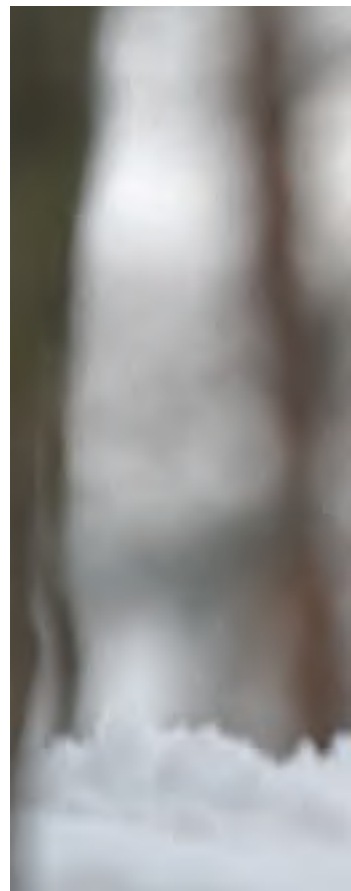

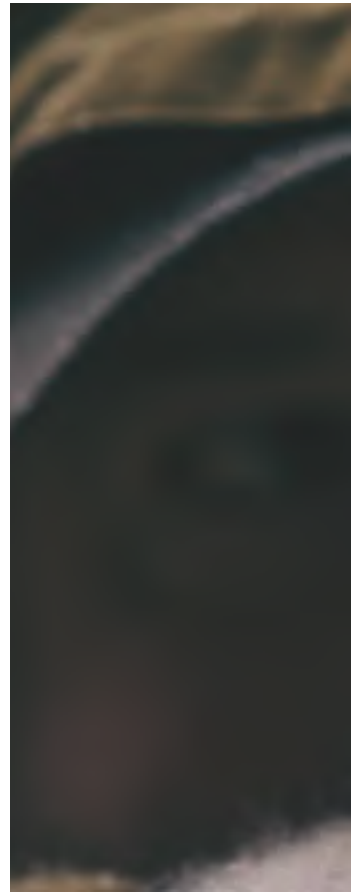

More Precise

Perfection at all distances

With their **Comfort Focus concept**, ZEISS VICTORY HT binoculars provide maximum precision while focusing. The conspicuously large focusing wheel and extra long translation enable you to focus with extreme precision to obtain the perfect focus.

The secret behind the precision of ZEISS VICTORY HT riflescopes lies in the ultra-fine illuminated dot and the **BDC+ (ASV+)** bullet drop compensator. The illuminated dot will impress you with its extremely low target subtension. The BDC+ enables a more precise shot at distances up to 600 m. Enjoy long-distance shooting the intuitive way – all made possible with ZEISS technology.

TECHNOLOGY FUNCTIONALITY

ZEISS VICTORY HT

The brightest binoculars from ZEISS

More brilliant

Unque visual experience

- The ZEISS VICTORY HT is not only bright, but also brilliant thanks to the integration of fluoride glass (FL) which enhances imaging performance. Not a single detail will escape you – day or night.

More Elegant

Design based on tradition

- The elegant design marks the continuation of the Dyalt design – timeless and functional.

Brighter

Into the night

- Hunt into the night thanks to 95% light transmission. SCHOTT HT glass, ZEISS T* multi-coating and the Abbe-König prism system deliver bright, high-contrast images.

.....

Clearer LotuTec®

- Clear vision in any weather. Rain and dirt are simply repelled thanks to the proven LotuTec coating.

.....

More Ergonomic Form follows intuition

- Maximum ergonomic convenience even when you wear gloves – all thanks to the new Comfort Focus concept featuring a large focusing wheel.

.....

More Robust Extremely durable

- The use of extremely solid, super-light magnesium guarantees maximum service life. As a result, ZEISS VICTORY HT premium binoculars are well suited for even the toughest conditions.

ZEISS VICTORY HT

Binoculars with light reserves

ZEISS VICTORY HT 8x42

All models set transmission records. The lightweight, reliable 8x42 is outstanding for universal use and expands your freedom of movement with large exit pupils, a wide field of view and extremely bright, steady images even in adverse light.

ZEISS VICTORY HT 10x42

The 10x42 is the standard for longer distances. It impresses with minute details and maximum brightness into the night. Thanks to the ergonomic design, the 10x magnification can be comfortably held and precisely operated.

ZEISS VICTORY HT 8x54

The revolutionary optical design enables ZEISS to transfer the performance of a 56 mm lens to a considerably lighter and more compact lens design. This makes the 54 model the most powerful binoculars for hunting at night from ZEISS. The 8x54 impresses with its outstanding ergonomics and large exit pupils. With light transmission of 95% and more, these binoculars set new standards even in the most adverse light.

ZEISS VICTORY HT 10x54

The 10x54 also meets the highest optical demands. Extreme brightness, maximum contrast and minute detail definition are combined into these particularly compact and rugged binoculars.

More Precise

At all distances

- Reliably land hits at long distances with the BDC+ bullet drop compensator. Set the distance and stay on target up to 600 m.

More Ergonomic

Form follows intuition

- A comfortable grip and rubber-coated surfaces ensure reliable operation of the illuminated dot, magnification changer and optional BDC+.

Finer

Minimal target subtension

- Minimal target subtension and precise dimming – that is the ultra-fine illuminated dot in the 2nd image plane. Unique light guides and nanotechnology enable precise aiming at small targets even at night.

ZEISS VICTORY HT

The brightest riflescopes from ZEISS

Clearer LotuTec®

- Keep your target clearly in sight in any weather. Rain and dirt are simply repelled thanks to the proven LotuTec® coating.

Brighter Into the night

- Enjoy bright, high-contrast images into the night. 95% light transmission thanks to SCHOTT HT lens elements, reticle technology without any loss of transmission and ZEISS T* multi-coating.

More Elegant Timeless design

- A compact design and slim eyepieces enable flat assembly on the weapon. The ZEISS VICTORY HT merges with even the most elegant weapon to create a perfect unit.

ZEISS VICTORY HT riflescopes

ZEISS VICTORY HT 1.1–4x24

Specialist for the driven hunt

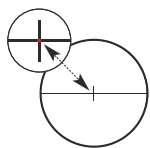

Perfect for driven hunts with an even larger field of view of 38 meters and maximum exit pupil for fast target acquisition and a reliable overview of the hunting situation. The model is also equipped with the Reticle 54 which permits a fast and reliable shot even when the illuminated dot is turned off thanks to the thin crosshairs.

ZEISS VICTORY HT 1.5–6x42

For stalking game

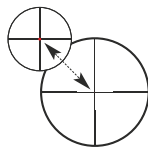

Whether a driven hunt or stalking game, this compact all-purpose scope will impress you with its fast target acquisition, but also enables shots at long distances thanks to the up to 6x magnification.

Reticle 54

Perfected for driven hunts

This enhanced reticle combines the proven reticles 0 and 54. It stands for fast and reliable shots with minimal target subtension. The extremely fine illuminated dot is located in the second image plane and remains the same size when the magnification changes. Thanks to the new horizon indicator, it is particularly well suited for fast aiming because it prevents weapon canting.

Reticle 60

Extremely fine and bright illuminated dot

The extremely fine, daylight-capable illuminated dot on the Reticle 60 can be activated when needed and impresses with its high light intensity. It can be continuously dimmed, making it ideal for any hunting situation. Its positioning in the second image plane ensures minimal subtension – only 0.55 cm at 100 m with 12x magnification!

ZEISS VICTORY HT 2.5–10x50

The powerful all-rounder

The ultimate all-rounder in the HT line for all hunting applications: whether you are shooting in motion or sitting, this riflescope is suitable for any hunting situation. The innovative optical design of the ZEISS VICTORY HT line really flexes its muscles in the twilight.

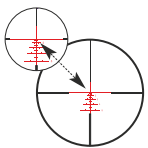

Photo: ASV+ option

ZEISS VICTORY HT 3–12x56

The nighttime hunting specialist

Built with SCHOTT HT glass, this specialist for sitting game at night makes even the smallest targets visible after the sun has set. In conjunction with the optional BDC+, this model featuring high magnification is ideal for reliable shots at long ranges and ensures hunting success even when the target is far away.

RAPID-Z® 5 reticle

Featuring holdover lines for long-distance shots

This long-distance reticle is equipped with indexed holdover lines that correspond to impact points at 200, 300, 400 and 500 m. In between are holdover lines and points for 25 and 50 m increments. An adjustment for the ballistics is made via the magnification setting. The indexed holdover lines feature wind marks to compensate for offset due to side wind. The entire target range of the crosshairs can be illuminated, thus making it ideal even in adverse light.
