.243 Win.

The .243 Win. is a very accurate cartridge, which is well suited as a roe deer and fox cartridge. The .243 Win. offers a balanced performance ratio for hunting these types of game.

The .243 Win. is based on the case of the .308 Win. Anyone who wants to carry a standard calibre in 6 mm is well advised with the .243 Win. - the GECO Express bullet with 76 gr for hunting at long distances, as well as the Softpoint with 105 gr and the Target Line for hunting-oriented practice shooting.

GECO Express

The GECO Express gives a flat trajectory, a high bullet velocity and a fast energy transfer – all combined in a unique new GECO design. The streamlined bullet shape combined with the new GECO Express Tip allows for extremely precise long distance shots without correction of the aiming point. The jacket design allows high bullet velocities which are maintained right to the target and give an extremely high energy yield resulting in clean kills.

Construction GECO Express bullet

Suitable for any hunting situation and reliable in effectiveness when long distance shots are required.

1. **GECO Express Tip:** For precision and flatness
2. **GECO BC-Shape:** For a low air resistance
3. **GECO Special Jacket:** For high knock-down power
