

RWS .308 UNI Classic 11,7g

Item no. 2119196

Field of applications

<i>Very well suited for</i>	Red deer, Fallow deer, Wild boar, Roe deer
<i>Well qualified for</i>	Chamois
<i>Suitable for</i>	Bear, Elk, Oryx, Badger, Fox

Properties

<i>Preservation of the game's meat</i>	High
<i>Stopping effect</i>	High
<i>Recoil</i>	Medium
<i>Penetration</i>	Very high
<i>Likelihood of exit hole</i>	Certain
<i>Cutting of hair at point of impact</i>	Yes

.308 Win.

As a hunting cartridge the .308 Win. is very suitable for medium-sized game up to medium red deer and wild boar. The strong points of this cartridge are the high universality, the high internal precision and the pleasant shooting behaviour.

Due to its high precision, the .308 Win. is also optimally suitable for sport shooting at long distances.

This cartridge replaced the .30-06 Springfield as ordinance cartridge in the USA and NATO adopted this cartridge as well. As a civil cartridge it was available virtually at the same time.

Apart from its use in repeating rifles, the .308 Win. is also excellent for self-loading rifles.

UNI Classic-bullet

Following on from the ID Classic, the UNI Classic was developed especially for heavy cloven game up to big game. This version reaches into the front softer part with its tip. This means that the projectile mushrooms less but the penetration force is.

Construction UNI-Classic-bullet

1. Harder tail-core for convincing penetration
2. Tail constriction for a mass-stable residual body and a sure bullet exit
3. Softer tip-core for controlled fragmentation and high effectiveness
4. Sharp edge for cutting of hair at point of impact
5. Nickel-plated steel jacket for increased barrel life
6. Torpedo-shaped tail for high flight stability
