

RWS 5,6x50 Mag. TM 4,1g

Item no. 2116499

Field of applications

Very well suited for Badger, Fox
Well qualified for Roe deer

Properties

Preservation of the game's meat Different
Stopping effect High
Recoil Very weak
Penetration Medium
Likelihood of exit hole Regulary
Cutting of hair at point of impact No

MRD

		50 m	100 m	150 m	200 m	250 m	300 m

5,6x50 Magnum

Three years after the introduction of the 5.6 x 50 R Magnum, the rimless version 5.6 x 50 Magnum for repeating rifles was put on the market.

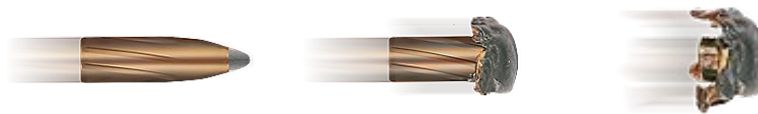

In Germany, the highly accurate 5.6 x 50 Magnum can be very well used on roe deer up to a distance of more than 200 m. The very good instantaneous effectiveness speaks for this cartridge with the 4.1 g soft-point bullets with pointed tip.

In Austria, it is a popular cartridge for chamois, as the 4.1 g bullets are perfectly suitable for this purpose.

Soft point-bullet

A well-proven projectile type still favoured by many today. High to very high energy output in game. Somewhat stronger fragmentation, therefore exit holes are not always present. Very good stopping effect. Frequently used in battues because of the above reasons and because of a certain insensitivity to minor obstacles. With round or pointed projectile tip.

Construction soft point-bullet

1. Lead core for optimal adaption of the deformation to the game's body
2. Round or pointed bullet tip for high stability
3. Tombac-plated steel jacket
