

# RWS 7x64 KS 8,0g

Item no. 2117568

## Field of applications

<i>Very well suited for</i>	Wild boar, Chamois, Roe deer
<i>Well qualified for</i>	Fallow deer
<i>Suitable for</i>	Red deer, Badger, Fox

## Properties

<i>Preservation of the game's meat</i>	High
<i>Stopping effect</i>	Very high
<i>Recoil</i>	Weak
<i>Penetration</i>	Medium
<i>Likeliness of exit hole</i>	Regularly
<i>Cutting of hair at point of impact</i>	Yes

## MRD

		50 m	100 m	150 m	200 m	250 m	300 m
MRD	100 m	-1.0	±0	-2.0	-8.0	-18.0	-34.0
	196 m	1.0	4.0	3.0	0.0	-8.0	-22.0

## Velocity & Energy

	0 m	50 m	100 m	150 m	200 m	250 m	300 m
V[m/s]	970	913	858	806	755	706	659
E[J]	3764	3334	2945	2599	2280	1994	1737

## 7x64

The 7x64 is an all-round cartridge for Central Europe. It can be used in the mountains just as well as for short hunting distances in the woods. It is suitable for medium-sized to heavy cloven-hoofed game like wild sheep, chamois or ibex.

The 7x64 is a balanced high-powered medium cartridge with an extended trajectory. Due to the wide range of bullets available from RWS, it can be adapted very well to any kind of hunting purpose.

## Cone point-bullet

The ingenious coordination between the Tombak jacket and core material provides flexible adaptation to the target resistance. Whether small or large game, the projectile mushrooms in a controlled manner and transfers energy uniformly into the game whilst still retaining an effectively enlarged residual body for exit. The external shape of the projectile provides ideal prerequisites for high precision and low air resistance.

## Construction Cone point-bullet

1. Tail constriction for a mass stable residual body and a sure bullet exit
2. Ballistically optimized cone shape for an extended trajectory
3. Tombac jacket
4. Lead core for balanced deformation behaviour with different types of game
5. Long bullet cylinder for highest precision
